THE YOUNGEST CC MASTER ?

Anthony J. Kain has achieved his established USCF CC Master's rating at the age of 18 – as far as I can determine, the youngest US player ever to achieve the title.

Anthony, born in Vero Beach, Florida, on April 7, 1989, is a pre-med student at the Honors College of Florida Atlantic University. Anthony believes that correspondence chess has tremendously increased both his patience and focus, which, he notes, are two great attributes for studying and life in general.

Anthony learned chess from his father. In June of 2004 he began playing chess at the Indian River County chess club. Humberto Cruz, a Florida CC Master, emailed me in February that, "A. J. Kain, a young member of our chess club in Indian River County, Florida, is very excited about the correspondence game and getting quite good at it." Humberto is a great talent scout!

Thus A.J. has played chess for nearly four years and correspondence chess for eight months. He has won the first three events he was entered in and is awaiting entry into the semifinals of the 2006 Electronic Knights which he has qualified for.

GAME OF THE MONTH

Kain demonstrates an interesting equation – $\text{Attack}^2 = \text{Victory}$.

LESSER LONDON LINE (A45)

White: Robert Beavan (2113)

Black: Anthony Kain, (2205)

Walter Muir Webserver 2007

1.d4 Nf6 2.Bf4

An opening without a well-established name, so I suggest the Lesser London Line as it soon transposes into the London System.

2...e6 3.e3 d5 4.Nd2 Bd6 5.Bg3 0-0 6.Bd3 b6 7.c3

White plans to open up the center as in the Colle, but with his King still in the center, and behind in development.

This position was seen in Ruch-Bollore, AJEC 1990, which continued more peaceably with 7...Bb7 8. Qc2 c5, but then turned into a roughhouse with 9. f4!?

7...a5 8.e4 dxe4 9.Nxe4 Bb7 10.Nxf6+ Qxf6

The outcome of the opening play mildly favors Black.

11.Qh5 g6 12.Qh3 a4 13.Ne2 Nc6 14.0-0 Ne7 15.Bh4 Qg7 16.Bg5 Ra5

A wild west kind of move, defending against White's threat of Bh6 by tactical means. White does not believe such things can be, or he would have elected to play 17. f4! with unclear chances.

17.Bh6 Qf6 18.Bxf8 Rh5 19.Qxh5

White can't try 19. Bxe7 Qxe7 20. Qg4 Bxh2+ 21. Kh1 Rh4 winning for Black.

19...gxh5 20.Bxe7 Bxe7

Point-wise, White is doing OK with two Rooks for the Queen, but Black's two Bishops and mobile Queen have an edge over White's clumsy Rooks.

21.f4 Qg7 22.Rf2 h4

Kain must love Rook Pawns because he has so many of them in this game, and all three of them make their way deep into enemy territory..

23.Raf1 h3!

If White could play Be4 to trade off the laser on b7, White might be able to hold.

24.g3 Bg2 25.Re1

Sooner or later White will have to play 25. Rxc2. I think he should do it sooner to better organize a defense of his King.

25...Bd6 26.f5 e5 27.Bb5

This is the wrong idea: White plays to kill a Rook Pawn, but Kain advances this one and then the other one.

27...a3 28.bxa3 h5 29.Rxc2! hxc2 30.Kxc2 Qg4 31.Rf1 h4

Kain's style is very determined: Non-attacking moves are not considered.

32.Bd3 h3+ 33.Kg1 e4 34.Bc4 c5 35.dxc5

The most painful thing about correspondence chess is defending a difficult position week after week (or day after day by email). As the position opens up, White's King faces more and more problems. White had to try the computer-defense with 35. Kf2 and Ke1 though Black stands better.

35...Bxc5+ 36.Kh1 Bd6!

Black will reposition his Bishop on e5 and then plan the invasion by ...Qd2 when White will be helpless against the disappearance of his queenside.

37.Nd4 Qg5 38.Be2 Be5 39.Rd1

Of course 39. Nb3 is punished by 39...Qe3.

39...Bxd4 40.cxd4 Qxf5

Technically material is even, but with his King in a box, the passed e-Pawn,

and uncoordinated pieces, White is busted.

41.Kg1 e3 42.Rf1 Qc2 0-1

Anthony begins college this fall. Good skill in mastering those classes, AJ !

2006 IOWA CC CHAMPIONSHIP

John Knudsen keeps adding kudos to his resume – second in the 1988 ASPCC, 2nd board in the 15 Olympiad, the “Chessdude cartoons,” an IM title followed by his SIM in 2004, the John F. Cleeve Memorial book reviewed last month, the 2005 Iowa State CC championship, and now a repeat as the 2006 champion. Way to go, John !

2006 IOWA STATE FINALS

Reuben Fine used to say that a Pawn was worth a finger. In this game from the championship, John grabs a Pawn in the opening and then skillfully disentangles himself into a winning endgame.

CC RATINGS ONLINE

The correspondence ratings are now a lot easier to find. As of 21 September (as this may change) you no longer need MapQuest. Just go to www.uschess.org then to “Resources” “Correspondence chess” and on the “Correspondence chess” page you will find Ratings.

WEB WATCH

QueenAlice is a free webserver where you can play correspondence chess with an international flavor. Supported in part by membership donation, located at www.queenalice.com, QueenAlice has been operating since 2004. I found the site very user-friendly. Upon entering, you are placed in a tournament of four players. The winner of the tournament goes on to the next round.

The games are rated based on the USCF Elo system. There are about 2700 members of the club, all playing CC. One innovation that I particularly liked is that there is a choice of two kinds of time controls, per move and per game. The per move time controls are 1,3,7, and 14 days per move; the per game time

controls are 10,30,60, and 90 days per player. I would like to hear from theorists out there: Is this dual time control better, worse, or just different from the standard 10 moves in 30 days time control of the USCF CC?

As an example of some of the fun available at Queen Alice, here is a game of mine from Round One of the introductory tournament.

Quote: Over the board masters in the main tend to belittle correspondence chess. Somehow it irks them to think that some players whom they would have no trouble in defeating over the board are capable of producing – certainly with considerable labor – games of a higher standard than the average over-the-board master tourneys.” – C. J. S. Purdy

SING ALONG WITH TEMKIN

Michael Temkin of Elkins Park, PA has sent in a correspondence chess song parody. Sting fans may shudder, but here is Michael's rendition of "King of Pain" by the Police.

KING of GREED

It seems that I'm a Pawn up today.
I got her response yesterday.
I took in the corner with the Queen
Just a move to consolidate is all I need.

I've got a few Days to think on this one
This opponent is harder than Attila the Hun
You can have time and space as long as you scream
Take six moves for a Pawn – I'm the King of Greed!

I'm happy with my position,
Attack for all I care –
I'm improving my position
Sack for all I care.

It seems that I'm a Pawn up today
So I can keep the Pawn – you say...
I expect to win in a month or so
Take a week on this move – my position is sound do-do-do-do-do

Well – I've never been even one Pawn down
I take every sacrifice, they're all unsound
More material, more material that's what I scream
That's why they call me the King of GREED!

-- Mike Temkin

SWIFT QUAD 06SQ06

Facing two Masters and another Expert, Steven Rosenthal scored 4 ½- 1 ½ to take undisputed first place. I was unable to attain any games from Steven, but here is a virtuoso win by second place Thomas Koehler.

His opponent, the always dangerous Joseph Shipman is a Master of the Pawn sacrifice in the opening. In the following game, however, Joe's sacrifice turns out to be a gift.

The following game is greatly entertaining – beginning with an unsound sacrifice on Move 16, Black manages to outplay White move by move until the mating attack at the end.
